

Projects with Baastel – Evaluations for the Global Green Growth Institute (GGGI)

Context

Between 2022 and 2024, SELVAR took part in two independent evaluations commissioned by Baastel (Belgium) under the Global Green Growth Institute's (GGGI) Colombia Country Program. These evaluations aimed to analyze the progress, impacts, and improvement opportunities of GGGI-supported initiatives in Colombia, with an emphasis on green growth, the forestry economy, sustainable livestock, and green investment services. Both consultancies provided strategic evidence to strengthen the program's management and guide the expansion of its results in Colombia and across Latin America and the Caribbean.

Project Description

1. Independent evaluation of some work areas of Phase II of the Green Growth Program

The objective of this assignment was to conduct an independent evaluation of key areas of Phase II of the Green Growth Program. SELVAR supported process mapping, impact assessment, and the identification of opportunities to scale and replicate good practices at the national and regional (LAC) levels. The evaluation focused on policy advice on the forestry economy and sustainable livestock, as well as the Greenpreneur green investment program, identifying lessons learned and strategic recommendations to strengthen them.

Duration

March 2024 - August 2024

2. Independent interim evaluation of the second phase of the Kingdom of Norway's financial support to GGGI's Colombia Country Program

SELVAR supported the mid-term evaluation of the second phase of the Kingdom of Norway's financial support to GGGI's Colombia Country Program. The objective was to assess the program's relevance, progress, results, and lessons learned, and formulate recommendations to strengthen its management in the final phase.

The process included field visits to Antioquia and Putumayo, and interviews with multiple stakeholders: government, the private sector, local communities, and green entrepreneurs, providing a comprehensive view of the impacts and challenges of green growth in the country.

Duration

October 2022 - March 2023
